Night Field Operations Log Entry

March 29, 2009

Time Began: 7:15pm

Time Ended: 9:00pm

Log Entry:

Research Team consisted of Sean Forker, Adam Cox, and James Baker initially. We arrived to the area to find a red Ford sedan (4 Door) parked at the Washingtonville Cemetery. This vehicle left shortly after we arrived.

Upon arriving at Bunker 1A – it should be noted that a fire was previously set in the Bunker, as smoke was still lingering in the interior. James planted some strawberry plants in this area – and around the bird houses near the Fed land fence. We also placed some popped popcorn to entice some bunnies with no luck.

Ernie Delp joined us around 8:10pm, just as darkness fell over the Ordinance. It was an uneventful night, lots of wilderness sounds springing through the night air. We could feel the cold front coming in.

We tried call blasting, as well as tree knocking. At various times throughout the evening, we used a Parabolic Mic to pick up on any distant sounds. As we began to leave the area – Adam described hearing a return whistle, a matching pitch, to Ernie's whistling sound.

Weather/ Environmental Conditions:

Waxing Crescent Moon

Time	Cond.	Felt	Dew Pt	Hum.	Visibility	Press.	Wind
7:05	Lt. Rain	49	42	77%	10 Miles	29.39 R	WNW 5 MPH
8:05	P.Cloudy	48	42	80%	10 Miles	29.41 R	WNW 5 MPH
